EXPERIENCE

IGAGE INFOSYSTEMS PRIVATE LIMITED, Bengaluru, India
Associate IT Support Engineer

Jul 2025 – Present

- Provided **technical support** to end-users by diagnosing and resolving hardware, software, and system-related issues.
- Delivered **desktop support** including installation, configuration, and troubleshooting of operating systems and applications.
- Troubleshoot **network connectivity issues** including LAN/WAN, IP configuration, and internet access problems.
- Assisted users with **login, authentication, and access-related issues**, ensuring secure system usage.
- Monitored and resolved **system performance issues**, minimizing downtime and improving reliability.
- Performed **basic routing and networking support**, ensuring smooth communication between systems.
- Managed **IT assets and inventory**, including tracking hardware/software and maintaining records.
- Documented **common issues and solutions** to improve support efficiency and response time.

EDUCATION

Graphic Era Hill University, Dehradun
B.Tech in Computer Science and Engineering

Sep 2021 – Jun 2025

- CGPA: 7.95 / 10.0
- **Coursework:** Data Structures & Algorithms, Operating Systems, Object-Oriented Programming

Nav Jeevan Mission School, Kushinagar
Senior Secondary (Class 12)

Apr 2019 – May 2020

- Percentage: 81.6%

PROJECTS

Crop Prediction and Crop Disease Detection System

Mar 2025 – May 2025

Tools Used: *React.js, Java, Spring Boot, Machine Learning, MongoDB, Docker*

[Project Link](#) 

- Built a crop recommendation and disease prediction system by integrating a machine learning model with a Spring Boot backend.
- Implemented JWT-based authentication and used MongoDB to store user information, crop prediction results, and disease detection history.
- Developed a responsive React.js frontend, integrated Cloudinary for image storage, and containerized backend services using Docker for scalable deployment.

AI-Powered Diagnostic Platform with Web Access

Jan 2025 – Apr 2025

Tools Used: *React.js, Node.js, TensorFlow, CNN, ANN, WebSocket, JWT*

[Project Link](#) 

- Engineered a full-stack diagnostic platform to predict diseases using TensorFlow CNN/ANN models with 85% accuracy.
- Integrated real-time chat using WebSocket and secured user sessions with JWT-based authentication and role-based access.
- Streamlined patient-doctor interaction through AI-based prediction, appointment booking, and secure communication.

TECHNICAL SKILLS

Operating Systems: Windows, Linux

Networking: TCP/IP, DNS, DHCP, LAN/WAN, Basic Routing & Switching

Technical Support: Desktop Support, Troubleshooting, Issue Resolution, System Configuration

Tools: Git, GitHub, Postman, VS Code, Remote Desktop Tools

IT Operations: Asset Management, Software Installation, User Access Management

Languages: Java, Python, JavaScript, SQL

Technologies: Spring Boot, React.js, Machine Learning

CERTIFICATIONS

Java Spring Framework 6 with Spring Boot 3 – Udemy

[Certificate Link](#) 

Complete A.I., Machine Learning & Data Science Bootcamp – Udemy
